

Ascent Leadership Ltd

Helping our talented people use AI tools effectively, responsibly, collaboratively and at scale.

AI changes how the work gets done. Making AI a competitive advantage and not just technology costs is the leadership and culture challenge.

That competitive advantage won't come from having access to AI. It will come from creating a culture where thousands of good decisions can be made every day using AI.

Information exists everywhere and increasingly AI can process it instantly. The bottleneck becomes decision-making. So how do we create and enhance the conditions where:

- ✓ People can make good decisions themselves
- ✓ The leadership culture supports our increased capability
- ✓ The cost for waiting for permission is minimised
- ✓ Leaders provide clarity needed to support critical thinking

Leading AI Adoption

Psychological Safety

Fostering an environment where experimentation and learning are encouraged.

Intent-Driven Leadership

Shifting from expertise to providing direction and context.

Systemic Challenge

Ensuring AI systems are continuously tested and improved.

Decentralised Decision-Making

Empowering teams to make decisions and learn from them.

Continuous Learning

Embracing AI adoption as an ongoing learning process.

Made with  Napkin
